

**We clarify it for you.**

Innovative chemicals  
for water-treatment

**SEPAR**  
CHEMIE 

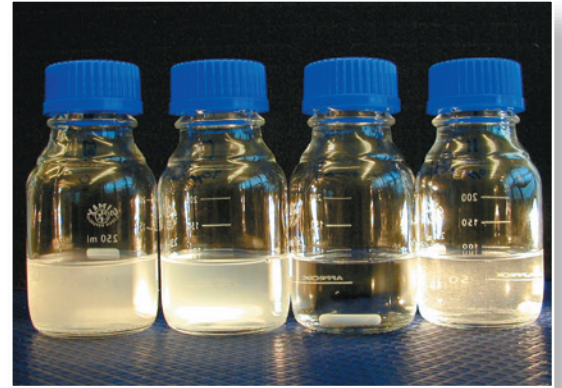

# Our Range of Services

## SOLUTIONS FOR ALL KINDS OF WATER TREATMENT PROBLEMS

We develop, produce and supply chemical products for numerous processes dealing with the treatment of water and sludge dewatering. You are looking for a special product – please contact us.

The strength of SEPAR CHEMIE lies in cross industry thinking. This way we develop out of the ordinary solutions, for example through targeted modifications to our products from the POLY SEPAR® range.

## SPECIALTY CHEMICALS FOR INDUSTRIAL WASTEWATERS

Our products are employed in the most varied industry sectors. With our broad product range we can treat a variety of problems in water circuits:

### METALWORKING INDUSTRY

- Heavy metal complexing agents
- Emulsion splitters
- Adsorbents
- Coagulants

### FOOD INDUSTRY

- Polymer flocculants
- Coagulants
- Emulsion splitters
- Defoamers
- Filter aids

### PAPER INDUSTRY

- Retention aids
- Defoamers/deaerators
- Bacterial growth inhibitors
- Crystallisation inhibitors
- Contaminant fixers
- Flotation agents

Metalworking industry

Food industry

Paper industry

## COMPETENT SERVICE CLEARS YOUR PROBLEMS

At **SEPAR CHEMIE** your wishes are our wishes. Should the process be efficient, easy to use or the chemicals as versatile as possible? We offer the following services:

- Detailed analysis of problems and situations
- Development of formulas on a laboratory scale or operational scale
- Free, supervised onsite trials
- Comprehensive and free consultation on process engineering and economic efficiency analysis
- Trouble shooting
- Preparation of samples
- Flexibility through our own warehousing

### STONE INDUSTRY/SAND- AND GRAVEL MINING

- Polymer flocculants
- Odour inhibitors

### PAINT AND COATINGS INDUSTRIES

- Adsorbents
- Flotation agents
- Decolouration agents
- Odour inhibitors
- Polymer flocculants

### OIL AND GAS WELLS

- Polymer flocculants
- Coagulants
- Products for the treatment of drilling fluids

### WASTE DISPOSAL SECTOR

- Viscosity reducers
- Emulsion splitters
- Metal complexing agents
- Adsorbents
- Products for AOX-reduction

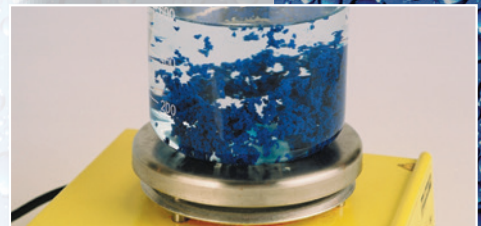

### TROUBLE SHOOTING FOR WASTEWATER PLANTS

- Adsorbents
- Odour inhibitors
- Products for the prevention of sedimentation
- Products for the control of filamentous bacteria

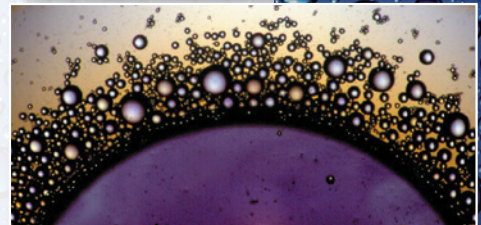

Stone industry/sand- and gravel mining

Paint and coatings industries

Oil and gas wells

Waste disposal sector

Wastewater plants

Please request our brochures with further information on the treatment of wastewaters in the paper, metal, paint/varnish industries and in communal wastewater plants, as well as our brochure for environmentally compatible products.

You will also find downloadable versions of our brochures on our homepage.

## INDIVIDUAL CHEMICALS FOR VARIOUS PROCESS APPLICATIONS

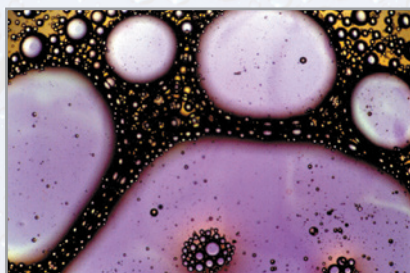

SEPAR CHEMIE develops, produces and supplies chemicals for the treatment of wastewaters, individually tailored to the characteristics in each process.

- **Versatile polymer flocculants** for wastewater treatment and sludge dewatering in communal and industrial wastewater plants.

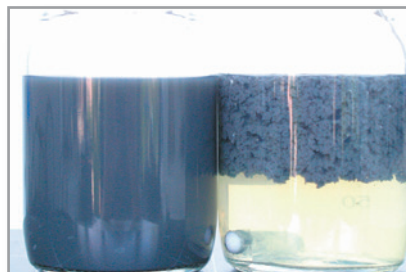

- **Viscosity reducers** for oil dewatering, crude oil, waste oil, slop oil.

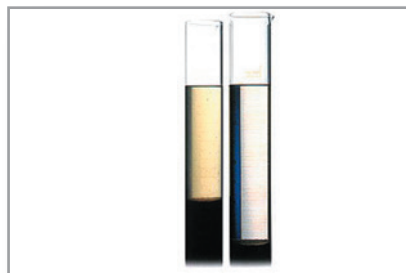

- **Emulsion splitters** for the preparation of drilling oil and grinding oil emulsions or oil-laden wash-waters.

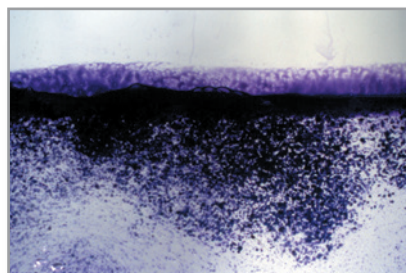

- **Specialty chemicals** for paper production..

- **Adsorbents, heavy metal precipitants and odour controlling agents** for the treatment of industrial process water.

- **Solid and liquid adsorbents and polymer flocculant** for the targeted treatment of wastewaters with excess COD-value.

- **Adsorbents and flotation agents** for the removal of dissolved paint particles in industrial wastewaters.

- **Defoamers** for communal and industrial wastewaters.
